Surrounded by mountains and nature, Thunderbirds Kids Camp is not an ordinary kids camp. When children walk into the activity center immediately they are welcomed and intrigued by the magical enchanted forest installation.

Long before the Pocono Mountains became a destination for families and relaxation seekers, the area was inhabited by some Native Americans tribes. The Shawnee tribe was one of the main tribes. In their tradition there are three spirits that control weather: Cyclone Person, The Four Winds, and the Thunderbird.

The Thunderbirds cause storms when they fight with the Great Horned Serpent and other evil creatures. Lightning is caused by blinking their eyes. Besides being extremely intelligent, they are a symbol of Power and Strength. This can be translated to children as being strong and having emotional and physical control over themselves.

Thunderbirds Kids Camp is a place where children will discover important things about life and culture. Through earning different badges, kids at an age range from 8-14 will learn lessons and slowly grow into “Thunderbirds”. From day one they will collect badges according to their skills and behavior and will progress from “Nest” through the last phase, “Thunderbird”.

Design concepts based on visual experiences create an interesting environment to learn. In the great room called Forest, children will have activities such as crafting, reading or watching a play, they will be entertained the whole time while learning. The Center and activities are designed under the universal design concept and it’s a very flexible space, accommodating everyone.

Sensory design and careful choices in the finishing materials induce a healthier experience by engaging children to the center.

A significant emphasis is placed on adopting an eco-friendly look and feel, with the presence of a FSC certified wood flooring element and carpet flooring made of recycled materials. Healthy indoor air quality with reduced VOCs is achieved by selecting low-emitting furniture and materials and installing indoor landscape.

On the second floor a residence is placed, along with executive office and conference room, following all the sustainable principles implemented on the first floor. The style of the residence differs from the first floor, as it encompasses a more mature color scheme. The second floor is also very conscious about the environment, and features a vertical garden on the living room wall, being also a barrier-free residence.

Thunderbirds Kids Camp and Residence is the perfect home for an environmentally conscious and educational space where children can learn lessons beneficial to their lifetime.
Long before the Pocono Mountains became a destination for families and relaxation seekers, the area was inhabited by some Native Americans tribes. In the Shawnee tradition tribe, there are three spirits that control weather: Cyclone Person, The Four Winds, and the Thunderbird. The Thunderbirds cause storms when they fight with the Great Horned Serpent and other evil creatures. For the Shawnee tribe the Thunderbirds are a symbol of Power and Strength, besides being extremely intelligent. That can be translated to children as being strong and having emotional and physical control over themselves.

Thunderbirds Kids Camp Concept

What if there was a place where children could learn about these mystical creatures among all the other elements of this amazing culture? Thunderbirds activity center is a place where children at an age range from 8-14 will learn lessons and grow into “Thunderbirds”, through earning different badges. The center includes activity areas inspired by the Nature Elements such as: Fire, River, Forest, Mountains, etc. The dramatic entry with the giant picture of the Thunderbird and an alcove seat welcomes you inside. Children will immerse into meaningful and playful activities around the past, present and future! Welcome to the Thunderbirds Kids Camp!
Recent research tells us that interior plants are good for buildings and people in a variety of subtle ways. Interior landscaping plays a vital role in providing a pleasant and tranquil environment in which to move, work, or relax. There is even evidence showing students perform better in improved learning environments.

The Benefits of Rock Climbing for Children with Special Needs

Rock climbing is a physically demanding activity that requires concentration, motor planning and sequential thought, among other skills. Full inclusion to accommodate children who have physical limitations or cognitive and sensory processing deficits can be challenging. However, children with special needs can reap many benefits offered by this appealing activity.

Flexible Layout

Based on the activity, the craft tables can be easily removed and switched out by bean bags during TV learning time, reading or just relaxation.

PSC certification ensures that products come from responsibly managed forests that provide environmental, social and economic benefits. The PSC Principles and Criteria provide a foundation for all forest management standards globally, including the PSC US National Standard (v. 0.1) that guides forest management certification in the U.S.
Thunderbirds is a place where children can go to discover important things about life. Through collecting different skill badges, kids at an age range from 8-14 will learn lessons and slowly grow into "Thunderbirds".

As soon as you enter the center you earn an EGG badge, because you just enter the NEST. The Activity Center has a great room in the center where most of the activities happen. The activity areas have their own symbols inspired by the Nature Elements such as: Fire, River, Forest, Mountains, etc.

Children will collect BADGES, according to their learning skills.

Chlorofluorocarbons (CFCs)
- Free Polyurethane (PU) Foam
- Polyurethane, a petrochemical resin that contains VOCs, is a known respiratory toxin. Uncured polyurethane can cause breathing problems such as asthma. Children and people with respiratory diseases are especially sensitive to the toxic chemicals in polyurethane.
Benefits of the Spider Plant

- Perfect indoor species survivor
- Proven by NASA, it removes more than 95 percent of toxic agents from the air
- When exposed to formaldehyde for 24 hours, spider plant reduced the formaldehyde levels by approximately 88 percent
- Appealing appearance

LYRA Plant Based (PB) High CAC

The unique fiberglass ceiling available in any color with both TOTAL ACOUSTICS and SUSTAIN performance.

New Technology for Offices

The patented Good Day®/Night® LED Downlight provides the flexibility to have the proper, healthy light at any time of day. Designed using Lighting Science’s patented GoodDay® and GoodLight® spectrum technologies, the downlight allows you to easily change the warm, sleep-enhancing spectrum of GoodLight® to the alertness and focus-enhancing spectrum of GoodDay®. Controlled by most standard wall switches or wirelessly using the Lighting Science® Wireless Switch (LDH SW201), this versatile downlight can help you to easily bring energy-efficient, circadian lighting in any area of your home, office or commercial installation. This dynamic technology that was first developed in collaboration with NASA to support the circadian rhythms.
